ANTLER KING[®]

*Over
30 Years
of
Research*

*The Science Behind
Attracting & Growing
Monster Bucks*

www.antlerking.com

For over 30 years **Antler King® Trophy Products Inc.** has been helping people grow bigger bucks and healthier deer through food plots and feed supplements. Whether you hunt on four acres or 40,000 acres, **Antler King®** products will help you grow *Bigger Bucks and Healthier Deer.*

Management Calendar

FEBRUARY, MARCH, APRIL, MAY

- Great time to use our *Instant pH Soil Test Kit* to test your soil and apply the proper amount of lime to your plots.
- Apply your spring application of Antler King's® *Plot Max* prior to planting plots.
- *Red Zone, Trophy Clover, No Sweat, Game Changer Clover, Small Town Throwdown* and **Antler King® Brand Chicory** can be planted as early as February in the deep South, but wait until April and May in the North, unless frost seeding *Trophy Clover Mix*, or *Game Changer Clover*.
- As soon as your Food Plots start sprouting in the Spring, it is time to give those plots an application

of Antler King's® *Plot Max* and *Jolt Foliar Fertilizer*.

- Establish mineral sites with Antler King® *Trophy Deer Mineral, Power Rack Mineral, Apple Burst Mineral*, and *Apple Burst Deer Block*. While you will find that the greatest consumption of these four products will be from February to September, it is important to keep these sites full of Mineral all year around. Continue your winter feeding program with the Antler King® *Hi Protein Big Buck Block, Energy Plus Wildlife Block, Sweet Apple Intensity* and *Attract-N-Fuel*.

JUNE, JULY, AUGUST, SEPTEMBER

- Use our *Instant pH Soil Test Kit* to test your soil before planting your fall plots, till in the lime and apply a fall application of *Plot Max* to ensure a maximum yield.
- *Red Zone* food plot can be planted during this period, just make sure it has 60 days to grow before the first frost.
- **Antler King® Brand Radish, Kale, & Sugar Beets; Honey Hole; and Slam Dunk** food plots can be planted as early as July in the North, wait until August or September in the South.

- *Fall/Winter/Spring Blend, Trophy Clover, Small Town Throwdown, Game Changer Clover, Lights Out* and *No Sweat* food plots can be planted late August in the North, wait until September or October for the South.
- Apply Antler King's® *Jolt* as often as you desire to encourage maximum growth in your food plots.
- Use *Final Feast, End Game Attractant, Apple Burst Attractant, Sweet Apple Intensity* and *Attract-N-Fuel* in front of your deer cameras to scout and get bucks accustomed to coming to those locations.

OCTOBER, NOVEMBER, DECEMBER, JANUARY

- You may apply Antler King's® *Jolt* up until frost stops the growth of your food plots.
- Get ready to start your winter feeding program or continuing a year-round feeding program by utilizing *Deer/Elk Protein Pellets, Energy Plus Wildlife Blocks, Hi Protein Big Buck Blocks* and *Attract-N-Fuel*.

- *Sweet Apple Intensity* is a tremendous attractant you can add to corn and use for baiting.
- Use *Final Feast, End Game Attractant, Apple Burst Attractant*, and *Attract-N-Fuel* to entice deer and be assured, they'll keep coming back for more!

**Please follow all state and local laws and regulations that pertain to deer baiting and wildlife feeding.*

Antler King® Instant pH Soil Test Kit

Limestone Makes Fertilizer Work!
Fertilizer efficiency goes up as soil acidity goes down!

- Know soil pH in 20 minutes.
- No need to send in soil samples.
- Includes four separate, accurate tests.
- Includes easy to read charts on pH levels and proper lime applications.
- The first and most important step in planting food plots.

Soil's pH	Fertilizer Wasted
4.5 →	71.34%
5.0 →	53.67%
5.5 →	32.68%
6.0 →	19.67%
7.0 →	0.0%

A very accurate, instant, and do-it-yourself kit that lets you test the pH in four different plots. Immediately tells you how much lime to spread to raise the pH to desired levels.

"Your products are great and the "Planting Food Plots" video was very helpful.

I made my very first plot using "NO SWEAT - NO TILL PLOT MIX". Added recommended lime and fertilizer, churned the ground up like your videos said and I am dually impressed. I took two samples of the soil and placed into pots. One before lime or fertilizer were added and one after, following instructions with the pH Soil Test Kit by adding the proper amounts of lime and fertilizer. Those samples were brought back home. I live 200 miles from my food plot and wanted to see how the product was growing from my home.

I added the seeds to the two pots I brought home a few days later. No water was added just what fell from the sky. The pots were placed in a spot where they would receive sun and shade for 6 hours a day. Look at this picture, the one on the right has the lime and fertilizer the other does not. Both are impressive with only THREE WEEKS OF GROWTH. Your DVD and pH soil test kit definitely helped this first time guy make this plot the best it could be. Now it is time to go back to the No Sweat Plot and spray on some Antler King® Jolt & Plot Max. Can't wait to see what's on my trail camera munching on this stuff." —Jason, NY

Antler King® DVD

"Planting Food Plots from A to Z"

Whether you are a beginner or a veteran, this DVD is designed to help everyone be more successful with planting food plots.

Includes:

- Why you should plant food plots
- How much and what to plant
- Where to plant
- When to plant
- How to figure food plot size
- Taking a soil test
- Importance of liming
- Correct fertilizer usage
- Different ground preparation methods
- Food plot maintenance
- Weed control
- Common mistakes when planting food plots
- Duration approx. 67 minutes

Ultimate "How To" Food Plot DVD.

GREAT VALUE

Antler King® Mega Food Plot Starter Pack

ONLY \$24.95

Includes sample seed packs – one each of the following...

- | | | | |
|-------------------------------|----------------------|-------------------------|--------------------|
| 1. Trophy Clover Mix | 2. Lights Out | 3. No Sweat Plot | 4. Red Zone |
| 5. Game Changer Clover | 6. Honey Hole | 7. Slam Dunk | |

Each pack plants 500 sq. feet

Plus.... Sample bottle of **Plot Max** — enough for all seven–500 sq. foot plots

Plus.... Sample bottle of **Jolt Foliar Fertilizer** — enough for all seven–500 sq. foot plots

Plus.... **Instant pH Soil Test Kit**– one test strip for each 500 sq. foot plots

Plus.... Antler King® **67 Minute DVD** “How To Plant Food Plots From A To Z”

“WHAT A VALUE!! I don’t care if we lose money on this pack. I’m confident that if you try our products, you will become a customer for life!”

—Todd Stittleburg, founder of Antler King® Trophy Products Inc,

Antler King® Brand Seeds

Antler King® Brand Chicory

- Special variety of chicory that is a hardy, cool season perennial and offers great nutrition.
- Adapts to a variety of soil conditions, pH tolerant, drought tolerant and grows fast.
- High protein mix that can be a stand alone crop or mixed with grains, clover, etc. Plants approximately a 1/4 acre.

Antler King® Brand Sugar Beets

- Packed with protein and energy, our Sugar Beets provide an all-around great food source for your deer.
- Planted in the spring or summer, Sugar Beets are an irresistible food source in the fall and winter.
- Works best as a stand alone crop planted in pH of 6.0 to 8.0. Plants approximately a 1/8 acre.

Antler King® Brand Kale

- Our special variety of Kale is a highly sought after food source.
- Kale grows best in the cooler climates of the Midwest, East, Northeast and Northern United States with a preferred pH 5.5 to 7.0. Plants approximately a 1/8 acre.
- Cooler nights and a timely frost will sweeten the leaves and increase consumption.

Antler King® Brand Radish

- The Antler King® brand Radish is cold tolerant, easy to establish, fast growing and provides a fantastic warm and cold season food source for whitetail deer.
- The “greens” of the Radish are packed with protein and vitamins and will produce plenty of tonnage, while the long white tap root will provide energy-rich nutrients.
- Radishes prefer a soil pH of 5.5 to 7.0. Plants approximately 1/10 acre.

RED ZONE

FOOD PLOT

All serious deer hunters are looking for ways to increase their chances of scoring on a trophy buck. **Antler King's® Red Zone** is designed to do just that! **Red Zone** is a blend of high protein plants such as forage soybeans, forage peas, buckwheat, and sunflowers. These plants will mature at different periods throughout the year, offering a food plot the deer can feed on in the spring, summer, fall, and winter. Plant **Red Zone** and put yourself in position to score this season!

"This year I decided to try Antler King® in my food plot. What a great decision! My plot is growing and the deer keep coming! I planted the Red Zone seeds in September and the results are amazing! I keep getting hundreds of pictures on my deer cams including a deer that I knew was in the area, but was never able to capture...until now! Thank you for such an amazing product, I will definitely continue using Red Zone!"
—Chad, Louisiana

West Virginia - Cody Jarrett, Whitetail Freaks® TV

Here is a picture of one of our Antler King® Red Zone plots we planted in Kansas. These three bucks are in there everyday so we established an Antler King® Trophy Deer Mineral/Power Rack site on the edge of the plot. Although in this picture the site is full of water (it rained two inches last night), you can see they have a big hole dug where they also visit the mineral site everyday! Love your products! —Dana, Louisiana

Plant in the spring for a tonnage producing, high-protein food source that's great for antler growth. Plant in the summer for a fall hunt plot.

- Contains varieties of high protein forage and grain soybeans, high protein forage peas, succulent buckwheat and sunflowers!
- Can be planted any time during the spring and summer even early fall for a late maturing food plot. *Note: When planting in the fall, plant at least 60 days before the first expected frost.*
- Provides a high protein food plot in the spring and summer.
- Provides a high energy diet for the fall and winter.
- **RED ZONE** plants mature at different times providing months of attraction and nutrition.
- **RED ZONE** is best planted with a drill, but if a drill is not available, broadcast the seeds and then drag them into the soil. The seeds in **RED ZONE** are quite large and if left on top of the soil, many will be consumed by birds. Try to cover the seeds with at least ½ inch of soil.
- Available in a 20 lb. bag which plants ½ acre.

Antler King® Trophy Clover Mix

With Chicory

- Comprised of hearty perennials that can last 6+ years.
- Includes four different varieties of Clover and one variety of Chicory.
- Provides up to 10 tons of 30%+ forage per acre, per year.
- Treated with Antler King's® Ultra Coat Orange for higher germination rates and increased forage yield.
- Great food plot for deer and turkeys.
- Available in ½ acre, three acre and six acre sizes.

Hunter Jacobs, West Virginia

Kip Campbell, Red Arrow® TV

"I harvested this magnificent buck on my small 36 acre property. The giant was only 4.5 years old and he unofficially grossed 221 4/8 inches non-typical. Using photos of the deer and his shed antlers, I estimate that this deer grew 65 inches last year! He is a genetic freak, but I believe that nutrition played a tremendous role as well. I harvested the buck on the edge of a field of Antler King® Trophy Clover Mix and he was photographed at my Antler King® Honey Hole plot as well. Antler King® products certainly helped this deer reach his genetic potential and I will continue to use Antler King® products in the future! Thank you, Antler King® for making a dream come true." —Jerad Dreeszen

The highest protein and tonnage producing clover & chicory perennial mix on the market! DEER LOVE IT and you'll love the results you see in antler growth.

Antler King® Small Town Throwdown

Antler King's® Small Town Throwdown can be an awesome ALL FALL HUNT PLOT. The special varieties of Clover, Chicory and Buckwheat can be a highly sought after early season food source, whereas the unique varieties of Kale, Rape and Rye can make a great late Fall food source for attracting and holding deer on your property.

- May be planted in the Spring or Fall. If you want your Small Town Throwdown Hunt Plot to be a Fall attractant, plant in the Summer or early Fall. If you want your Small Town Throwdown Hunt Plot to be a preferred food source in December, January or February, plant Small Town Throwdown in the Spring.
- 4 lb. bag plants slightly more than a 1/4 acre.

Brantley Gilbert, Country Music Artist

Small Town Throwdown makes a great ALL FALL Hunt Plot!

Antler King® Planting Guide

Antler King® Seed Mix	Perennial or Annual	Planting Time	pH Level Required	Seeding Rate	Seed Depth	Proper Fertilizer	Option with JOLT Fertilizer
Trophy Clover	perennial	Spring or Fall	6.2 & above	7 lbs./acre	¼ inch or less	5-15-30 300 lbs./acre	200 lbs./acre plus 2 Applications of Jolt
Small Town Throwdown	Mix of annual & perennial	Spring or Fall	6.0 & above	16 lbs./acre	¼ inch or less	5-15-30 or 9-23-30 300 lbs./acre	200 lbs./acre plus 2 Applications of Jolt
No Sweat	Mix of annual & perennial	Spring or Fall	5.5 & above	18 lbs./acre	¼ inch or less	13-13-13 or 19-19-19 300 lbs./acre	200 lbs./acre plus 2 Applications of Jolt
Honey Hole	annual	late Summer or early Fall	6.0 & above	6 lbs./acre	¼ inch or less	19-19-19 or 13-13-13 300 lbs./acre	200 lbs./acre plus 2 Applications of Jolt
F/W/S Blend	annual	Fall only	5.5 & above	68 lbs./acre	1 inch or less	19-19-19 or 13-13-13 300 lbs./acre	200 lbs./acre plus 2 Applications of Jolt
Red Zone	annual	Spring, Summer, Fall	6.0 & above	40 lbs./acre	1 inch or less	19-19-19 or 15-15-15 300 lbs./acre	200 lbs./acre plus 2 Applications of Jolt
Slam Dunk	annual	Summer or early Fall	6.0 & above	14 lbs./acre	½ inch or less	19-19-19 or 13-13-13 300 lbs./acre	200 lbs./acre plus 2 Applications of Jolt
Lights Out	annual	Summer or early Fall	6.0 & above	48 lbs./acre	½ inch or less	19-19-19 or 13-13-13 300 lbs./acre	200 lbs./acre plus 2 Applications of Jolt
Game Changer	perennial	Spring or early Fall	5.5 & above	10 lbs./acre	¼ inch or less	5-15-30 300 lbs./acre	200 lbs./acre plus 2 Applications of Jolt

No Sweat No Till Plot Mix

Jason Bosaw - Whitetail Freaks® TV

Antler King's® No Sweat Plot Mix is an excellent mix for minimum or no till plots, such as logging roads, shady areas, or areas where you cannot use equipment. **No Sweat** contains the ideal mix of perennial and annual seeds, which have been chosen because they are...

- Shade Tolerant
- Easy To Establish
- Fast Growing
- pH Tolerant
- 4.5 Lbs. Plants 1/4 Acre
- Little or No Tilling Needed

**Grow,
Attract &
Hold Big Bucks
on Your
Property!**

No heavy equipment necessary to create your own fantastic hunt plot!

This **NO SWEAT** plot receives about five hours of sunlight per day. The area originally had extensive weed growth, so weeds were sprayed with a weed killer and **Antler King's® PLOT MAX** on August 15th. Then 7 days later, a steel garden rake was used to scratch up the top 1-2 inches of soil. **Antler King's® NO SWEAT** seed mix was broadcast and dirt was lightly raked back over the seeds making certain that all seeds were less than ½ inch deep. On September 10th, this plot was sprayed with **Antler King's® JOLT FOLIAR FERTILIZER**. This picture was taken September 30th .

"I planted No Sweat two weeks ago... this stuff is awesome!! I will be putting more in soon. Thanks."

—John K.

Antler King® Honey Hole

- Unbelievable fall and winter hunt plot.
- Comprised of five varieties of Rape and Turnips.
- For best results plant in late summer or early fall.
- Cool weather tends to increase consumption.
- Available in 1/2 acre bag.
- Treated with Antler King's® Ultra Coat Orange for higher germination rates and increased forage yield.

"I just wanted to thank Antler King® for making an incredible product!

I own 78 acres and planted this food plot with Antler King® Honey Hole Mix the third week in August. With the dry summer I never expected the mix to grow, but as you can see from the pictures, it exceeded expectations. Because of your food plot mix, I was able to keep this buck in the area and shot him with a bow on November 9th. This buck had a gross, non-typical green score of 206 5/8. Thank you again for creating a great product!!" —Cory Esker

Jim Olsson

Steve Kuney

Fantastic Northern Hunt Plot! We have seen Honey Hole plots three feet tall devoured within ten days. When the time is right — deer love it!

Antler King® Fall Winter Spring

Kandi Kisky, Whitetail Freaks TV

"Kandi passed up this buck the previous year as a 3 year old while feeding in a Fall/Winter/Spring blend plot. Move forward one year and as a result of being on the Antler King® Minerals, Blocks and Food Plot program, he put on 40 plus inches of Antler Growth and held tight on that farm and was able to be harvested in December the next year."

- Unique annual blend that grows extremely fast and stays green all fall and winter.
- Unbelievable hunt plot!
- Can be 6-8" tall in 10 days!
- Plant in fall only.
- Available in 1/2 acre bag.
- Great source of protein in early spring to enhance antler development.

Stuart Cartwright, Arkansas

The best hunt plot available — period! Will attract deer everyday from Sept. 1st until Jan. 31st.

Antler King® Slam Dunk

All Fall Hunt Plot - Slam Dunk's Hunt Plot is designed to attract and hold deer on your property **ALL FALL**. The special varieties of Winter Peas and Buckwheat can be early Fall food sources, whereas the Antler King® Brand Radishes and Forage Rape can be late season food sources.

- 3.5 lb. bag plants a 1/4 Acre.
- In the Midwest and Northeast, plant late June, July, August, or early September.
- In the South plant late July, August, September, or early October.

Pat McFadden

Kip Campbell, Red Arrow® TV

Tim Tibbits

Antler King® Lights Out

Forage Oats & More

- Easy to Grow
- pH Tolerant
- Grows Extremely Fast
- Extremely weather tolerant mix
- Plant seeds less than 1/2" deep
- Spread 100 lbs. of 19-19-19 fertilizer for every 1/4 acre
- 12 lb. Bag Plants 1/4 Acre

Phenomenal, don't know but phenomenal! Pretty much sums it up! The deer absolutely demolished my **Lights Out** plot, and what I do know is I need to plant more of it next year! Antler King® did it again with this mix, awesome!
—Don Kisky - Whitetail Freaks TV

For best results plant:

Northern Zone: August 1st - September 15th

Central zone: September 1st - October 1st

Southern Zone: September 1st - October 20th

Antler King's® **Lights Out Forage Oats & More** is an awesome ALL FALL hunt plot that will attract deer all Fall and Winter. The special varieties of Forage Oats, Turnips and Canola will be a highly sought after food source by the whole deer family. Beginning early in the Fall and extending into Winter, **Lights Out** makes a fantastic hunt plot EVERY day of the hunting season!

The Science Behind Growing Monster Bucks

Kip Campbell, Red Arrow® TV

Antler King® Game Changer Clover

Game Changer is a Perennial Clover Mix that can last for up to 4 Years!

Ideal for...

- Minimum & No Till Plantings
- Logging Roads
- Lower pH Soils
- Backwoods hunt plots
- No heavy equipment necessary to create your own perennial clover plot.
- The seeds in **Game Changer Clover** have been chosen because they are shade tolerant, pH tolerant, and can grow with little or no tilling.
- Use in an area that will get at least 4 hours of sunlight per day. Areas that have full sunlight will allow the plants in **Game Changer** to produce even more forage.
- Although **Game Changer Clover** seeds can grow in pH soil as low as 5.0, we recommend raising the pH to a 6.0 or above for maximum tonage and longevity.
- Eliminating weeds is essential. You must do your best to eliminate the existing forage in order to allow the seeds in **Game Changer** good seed-to-soil contact and to get established without competition from existing weeds. If planting **Game Changer** in a tilled field make sure the seeds are LESS THAN ¼ inch deep.
- A must for planting any food plot is **Antler King's® Plot Max** which will help raise the pH, aerate the soil, raise organic matter, help the soil retain moisture and create an environment for the plants to thrive and maximize their growth potential.
- After the plants are 3 inches tall, spray monthly with **Antler King's® Jolt Foliar Fertilizer**. Using JOLT can greatly increase the tons of forage you can produce on any food plot. **Jolt** has been formulated to provide plants food for growth.
- 2.5 lb. bag plants 1/4 acre.

USA Planting Zones

SPRING PLANTING AND/OR FALL PLANTING

Yellow	Mar. 1st – June 1st	Aug. 15th – Sept. 15th
Green	Feb. 1st – June 1st	Aug. 15th – Sept. 20th
Pink	Feb. 1st – April 30th	Sept. 1st – Oct. 1st

Maximize Your Food Plot Performance

PLOT MAX

Antler King's® PLOT MAX is easy to use! Just mix with water! PLOT MAX can be sprayed anytime spring or fall on established plots or prior to planting new plots. Optimize germination, root development, growth, and moisture retention through improved soil conditions with Antler King's® PLOT MAX. Apply PLOT MAX in both spring and fall to maximize your food plot performance!

"The summer of 2007 brought drought like conditions to one of our test farms. I was absolutely amazed to see fields we had sprayed with PLOT MAX did not burn up, whereas, adjoining fields not sprayed with PLOT MAX, but planted with the same seed mix, eventually succumbed to mother nature. PLOT MAX's ability to help soil retain moisture, spike pH levels, unlock nutrients and raise organic matter, all make for the potential to produce maximum tons of forage on any plot. This may be the biggest product we have brought to the market in 29 years!"

—Todd Stittleburg, founder of Antler King®

These soil tests are from the same field. Half of the field was sprayed with Antler Kings® PLOT MAX (B1) and the other half was **NOT** (B2). This field has been fertilized and limed equally for the last five years. Compare the soil tests and see what a difference PLOT MAX made!!

- **Increased pH!**
- **Increased available organic matter by almost 20%!**
- **Increased the amount of available mineral and nutrients by over 50%!**

FIELD B1		Oct. 2007 Food Plot side SPRAYED with PLOT MAX									
Sample No.	Text Code	Est CEC	Soil pH	O.M. %	P ppm	K ppm	Ca ppm	Mg ppm	B ppm	Mn ppm	Zn ppm
1	2	7	6.8	2.6	97	135	810	260	0.6	14	9.7
Adj Avg:		7	6.8	2.6	97	135	810	260	0.6	14	9.7

Half of Food Plot Sprayed with PLOT MAX

FIELD B2		Oct. 2007 Food Plot side NOT sprayed with PLOT MAX									
Sample No.	Text Code	Est CEC	Soil pH	O.M. %	P ppm	K ppm	Ca ppm	Mg ppm	B ppm	Mn ppm	Zn ppm
1	2	4	6.6	2.2	64	82	620	220	0.4	9	4.3
Adj Avg:		4	6.6	2.2	64	82	620	220	0.4	9	4.3

Half of Food Plot NOT Sprayed with PLOT MAX

These pictures were taken in Sept. of 2007 after an extended dry period in which rainfall totals were six inches below average. In May 2007, half of the field was sprayed with Antler Kings® PLOT MAX the other half was not. The same seed mix was planted over the entire field. This field has been limed and fertilized the same over the past 5 years. These pictures show the tremendous difference the use of PLOT MAX has made. The side of the field that was not treated with PLOT MAX literally burned up! Retaining moisture in the soil is just one of the many attributes of PLOT MAX.

Application Rate: Mix one-32 oz. container of PLOT MAX with at least 8 gallons of water and spray entire solution on a 1/2 acre existing food plot or on a new plot prior to planting.

MAY BE PUT IN SAME TANK WITH A CONTACT WEED KILLER SUCH AS ROUNDUP, SO WITH ONE PASS YOU CAN APPLY THE PLOT MAX AND KILL THE WEEDS.

Plot Max's ability to retain soil moisture, raise pH and organic matter, and unlock available minerals and nutrients in the soil makes this a must for every plot, regardless of soil type and location.

Antler King® JOLT 9-17-8 Foliar Fertilizer

Antler King's® JOLT Foliar Fertilizer is easy to use — just mix with water and spray over any food plot after plants are at least 3 inches tall. With conventional dry granular fertilizer, you have to pray that it will rain to dissolve the granular fertilizer and wash it down to the roots of the plants. Without a timely rain, you risk the granular fertilizer burning the plants your trying to help grow. With JOLT, you can optimize your plots potential for maximum tonnage. By spraying the JOLT solution onto the stem and leaves of the plants, it is similar to spoon feeding the plant, an efficient and readily available fertilizer.

Red Zone Food Plot

▲ This Antler King® **RED ZONE** plot had the same amount of 19-19-19 fertilizer applied prior to planting. After planting, the plot was divided in half by a red rope. Antler King's® **JOLT** foliar fertilizer was sprayed on only one side of the plot when the plants were over three inches tall. Photo above was taken three weeks after spraying half of the **RED ZONE** plot with **JOLT**. This shows the amazing increased growth of the side that was sprayed with **JOLT** which reached over six inches more in forage growth.

- Spray **JOLT** weekly, biweekly, or monthly – based on desired results.
- **JOLT** can also be applied to natural vegetation, such as, fruit bearing trees, honeysuckle and other plants that are either natural food sources or provide wildlife cover.

The biggest challenge nearly everyone has with food plots is simply not being able to plant enough acres of plots, and in many instances, a deer herd has wiped out a plot before hunting season is over. Antler King's® JOLT and PLOT MAX can maximize the tons of forage you can provide on any food plot!

JOLT is an economical and efficient way to maximize the tons of succulent forage you produce on your food plots. NO RAIN, NO WORRY — you spray as often as you desire to “spoon feed” the plants!

The Science Behind Growing Monster Bucks

Antler King®

ENERGY PLUS Wildlife Block

- Contains 3% fat (energy).
- Research shows that a higher energy (fat) is critical for antler and body growth.
- Contains 16% protein.
- Research also shows that a minimum of 16% protein diet is required for maximum antler and body development.
- Includes high levels of antler building minerals and vitamins.

7.5 lb.
Block

Don Kisky - Whitetail Freaks TV

Great fall attractant and a MUST for winter feeding to post rut bucks that need a lot of energy after the rut. DEER LOVE IT!

Antler King®

Hi Protein Big Buck Block

A very palatable block that gets the protein, vitamins and minerals in the deer for maximum antler growth.

"We have used Antler King's® Blocks, Minerals, and Food Plot Seeds on the Lee farm in Georgia for many years and have seen a huge increase in the number of deer we see, larger racks on the bucks and an overall healthier deer herd."

—Michael Lee, Backwoods Life® TV

- 18% Protein Block.
- Contains high levels of chelated antler building minerals.
- Contains a special concentrated yeast culture that allows deer to digest food easier and put more nutrients into bone and antlers.
- Perfect block for deer/elk ranchers, landowners and backyard feeders.
- 25 lb. Block

Antler King® Sweet Apple Intensity

NEW

This mega concentrated apple flavored powder is designed to help attract deer and support digestion.

SWEET APPLE INTENSITY is a corn and feed additive that increases attraction and consumption with an irresistible flavor and aroma. A 16 ounce bag treats 500 pounds of corn or feed.

SUPPORTS DIGESTION:

INTENSITY contains a concentrated yeast culture that supports digestion. Maximizing deer nutrition requires an adequate supply of nutrients available for maintenance, muscle accretion, antler growth, fetal development and milk production. Microflora within the rumen of the deer are essential in breaking down feed and converting it to energy. Moreover, rumen microbes synthesize amino acids, protein, B-vitamins and other nutrients. Maintaining a healthy population of rumen microbes by providing adequate nutrients ensures deer are actually able to utilize the feed they consume.

ATTRACTS DEER:

With its fresh apple scent, INTENSITY will attract more deer to your feeding area. In field tests, feed containing INTENSITY was consumed twice as fast as feed topped with other attractants.

USE AS COVER SCENT:

INTENSITY can also be used as a cover scent by sprinkling the powder on branches and leaves near your tree stand or ground blind.

Antler King® Attract-N-Fuel

Antler King® has devoted many years of research on utilizing different flavors to attract deer. The proprietary flavor used in ATTRACT-N-FUEL is highly sought after by deer.

“Generation Next” technology uses a special yeast culture in ATTRACT-N-FUEL that improves Rumen function which in turn supports body mass, antler growth, herd health and milk production.

Antler size, body weight and reproductive efficiency are all dependent upon a healthy and properly functioning digestive system. The yeast in ATTRACT-N-FUEL is research proven in whitetail deer to optimize digestive function, allowing for peak efficiency and maximum genetic potential.

Maximize Antler Growth - During the developmental stages, antlers are comprised of approximately 80% protein, with the remaining 20% being mostly macrominerals (primarily calcium and phosphorus). Therefore, it is critical that these nutrients are readily available in order for the buck to reach maximum genetic potential for its age. By improving digestibility and retention of protein and macrominerals, more key nutrients are available for antler growth.

ATTRACT-N-FUEL can be used all year long to optimize deer digestion and to attract deer in front of game cameras and stand sites. Mix with corn or use by itself to provide premium nutrition and maximize genetic potential.

NEW

The Science Behind Growing Monster Bucks

"Antler King's® Trophy Deer Mineral has made a significant verifiable difference in the rack size of the bucks on my property. I also believe it has made our whole herd healthier!"

—Joe Bucher

Antler King® Trophy Deer Mineral

Antler King® Trophy Deer Mineral was the first product Animal Nutritionist Todd Stittleburg developed over 30 years ago. Over the years, due to science and continued research a few tweaks have been made to the original formula and it remains America's #1 choice for Deer Mineral. Science was the basis for this product and science continues to be the basis behind all Antler King® Products! **Enjoy growing Bigger Bucks and Healthier Deer!**

- #1 Deer Mineral on the market.
- Contains 27 different antler building minerals, vitamins and additives.
- Includes a special yeast culture, helping deer become more efficient when eating and digesting their food.
- Comprised of highly digestible chelated minerals.
- Greatest consumption will be from February through September.
- Easy to use, just pour the bag out next to a deer trail.

America's #1 Choice for growing big bucks!!

FOR MAXIMUM ANTLER GROWTH mix one bag of POWER RACK with one bag of ANTLER KING'S® TROPHY DEER MINERAL.

Antler King® Power Rack Deer Mineral

Antler King® has researched deer nutrition for over 30 years. We have discovered that special trace minerals are very important for antler growth and the overall health of deer. **Antler King's® Power Rack** is loaded with these trace minerals. **Power Rack** may be used as the sole source of your mineral feeding program, or mixed with one bag of Trophy Deer Mineral.

Attract Tons of Deer!

The next step in growing monster bucks!

Loaded with Special Antler & Body Boosting Trace Minerals

The Science Behind Growing Monster Bucks

Antler King® End Game Deer Attractant

- A long range deer attractant that offers high protein and energy content for cutting edge nutrition and an irresistible flavor and aroma for maximum attraction.
- Utilizes Antler King's® very own special proprietary flavoring with 2X the attracting power.
- Endorsed by Kip Campbell and Red Arrow® TV on The Outdoor Channel
- Can be used as a High Energy Fall Attractant in front of your tree stand or game camera or as a high protein supplemental feed to maximize antler growth in the Spring and Summer.
- Mix with feed or pour directly on the ground in 2-3 inch strips or in small piles in your hunting area. For best results, use all 5 lbs. at each site for attracting or supplemental feeding deer.

"Unlike most attractants, End Game not only brings deer close, it's actually good for them... until you shoot them."
—Kip Campbell, Red Arrow® TV

The Science Behind Attracting Deer

Antler King® Final Feast

Antler King® has researched deer feeds and ingredients that make up deer feeds for over 30 years.

Antler King® has found that when you combine certain ingredients **ALONG** with a special proprietary flavoring, an irresistible, addictive attractant is the result... **FINAL FEAST** is that attractant, made only by **ANTLER KING®**!

- Use **Final Feast** in front of your deer cameras to scout and get bucks accustomed to coming to those locations.
- Attract deer and be assured, they'll keep coming back for more!
- An addictive, irresistible deer attractant!
- Just pour out and get ready to hunt!
- Pour directly on the ground in 2-3" deep strips or in small hill sized piles near the area you want to hunt or in front of your game cameras.

Kyle Wieter, Adrenaline Junkies® TV

The Science Behind Growing Monster Bucks

Antler King® Apple Burst Deer Block

This huge 20 pound mineral block is fortified with vitamins and minerals with an irresistible taste and smell of apples.

Deer crave these hardened mineral-based blocks that provide beneficial mineral nutrients to promote antler growth and keep deer on your land.

The Science Behind Attracting Monster Bucks

Antler King®

Apple Burst Deer Attractant

This irresistible deer attractant can be poured directly on the ground in 2-3 inch deep strips, in small piles in your hunting area, or in front of your game cameras.

Add this apple-flavored attractant to trough-style feeders with your regular feed to increase consumption and attraction.

Apple Burst Deer Attractant can be used as a feed topper/additive or in gravity feeders by carefully stirring the product in with your regular feed together to help avoid any clogging when dispersing.

Pour out and get ready to hunt!!

"Great nutrition for antler growth!!"
—Don Kisky

"Awesome for using over trail cameras!!"
—Kandi Kisky

The Science Behind Growing Monster Bucks

Antler King®

Apple Burst Deer Mineral

Make one feeding station of **Antler King® Apple Burst Deer Mineral** on the ground near deer trails or other areas frequented by deer. Our five-pound bag will make a one-pile feeding station for a 40-60 acre area. Check each station weekly and add more Apple Burst Deer Mineral when needed.

Apple Burst Deer Mineral contains all major minerals and is **MEGA** fortified with specific trace minerals necessary for antler growth and improved overall health. The greatest consumption will occur between March and August. This is also the time period when antler growth is occurring and when fawns are nursing on does. Although consumption drops dramatically after the antlers are developed, it is important to have **Antler King® Apple Burst Deer Mineral** available **YEAR-ROUND**.

Antler King® Deer/Elk Pellets

- Ultimate deer and elk feed that is research proven.
- High protein, with high levels of minerals and vitamins.
- Contains a special yeast culture making deer more efficient.
- Manufactured with a “Locked Formula” for consistent feed.
- Used by deer/elk ranchers, landowners, and backyard feeders.

“This bull scores 570+, (his score was 443 0/8 as a 3 year old) measured by North American Elk Breeders trained antler scorers. At Mariah Elk Farm we use Antler King® Deer and Elk Pellets as our base feed, along with Antler King® Trophy Minerals. I don’t think anyone could argue the results, we are pleased and will continue using your fine products.”

Bob Root, Mariah Elk Farm

A feed designed to allow deer and elk to reach their genetic potential.
